

Math Review Packet - Lin

Problem 1: $12 + 7 = 20$

Teacher note: wrong, recount the ones.

Problem 2: $9 \times 6 = 54$

Teacher note: correct.

Problem 3: $\frac{3}{4} + \frac{1}{4} = \frac{7}{8}$

Teacher note: wrong, the denominator should stay 4.

Student reflection: I added top and bottom.

Problem 4: Solve $18 - 9 = 8$

Teacher note: wrong, subtraction fact slipped.

Parent concern: rushing through basic facts.

Problem 5: $2(x + 3) = 2x + 3$

Teacher note: wrong, distribute to both terms.

Student wrote only one term after distribution.

Problem 6: Word problem about 24 stickers shared among 6 boxes.

Student answer: $24 + 6 = 30$

Teacher note: wrong operation chosen from the prompt.
